

Biotechnique Avance

Product Data Sheet

Printing Date: 01-01-20

Issued: 01-01-20

Section 1: Notification of the Substance/Preparation and the Manufacturer

Product Details: Atomized carbon in high viscosity suspension of photodynamic dyes. Hypoallergenic, for topical application only. Not for ingestion. Contains denatured ethyl alcohol 1- 2% by volume as a stabilizer.

Use: To be used in conjunction with laser and IPL treatments to enhance permanency of hair reduction.

Supplier Details: www.centre-biotechnique-avance.com

Section 2: Composition/Information on Ingredients

Chemical Characterizations

Ingredient Name	CAS N.	TJ%TCS No.	%w/w	Risk
Carbon	1333-86-4	"	1 - 2	"
FD&C Black #2	74.2052	"	1 - 2	"
Metal Oxides	1317-61-9	"	1 - 2	"
Ethyl Alcohol	64-17-5	"	1 - 2	toxic
Carbomer	9003-01-4	"	4-6	"
2-(2-Ethoxyethoxy) ethanol	111-90-0	"	0.1 - 0.2	Eye Irritant

Section 3: Hazards Identification

CONTAINS DENATURED ALCOHOL 1-2% w/w

Denatured alcohol is a mixture of ethanol (ethyl alcohol) with a denaturing agent. Ethanol is considered broadly toxic and linked to birth defects following excessive oral ingestion. Potential risks from ethanol in personal care products are significantly smaller than the health risks posed by the consumption of alcohol.

Contains diethylene glycol monoethyl ether, Irritant, Keep out of eyes and clear of mucous membranes.

FOR EXTERNAL USE ONLY
